REASONS for ALLOWANCE

The following is an examiner's statement of reasons for allowance:

A close prior art, Hase et al. (U.S. Patent No. 6,365,925), discloses most of the limitations of the claims, but fails to show at least an n-type second compound semiconductor layer having an impurity doping density ranging from $1 \times 10^{17} \text{ cm}^{-3}$ to $1 \times 10^{18} \text{ cm}^{-3}$ with an energy level lower than the first compound semiconductor layer and energy level greater than the third compound semiconductor layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Bayraktaroglu (illustrates a MESFET with InGaAs etch stop), Jeong et al. (illustrates a FET with GaAs and AlGaAs layers), Minetani (illustrates compound semiconductor MESFET) and Passlack et al. (illustrates a EMOFET with III-V semiconductor substrate).
